

Project Description: Arcoplast Antimicrobial Partition Walls, Wall Liners, & Doors

We had the privilege to complete an extensive Arcoplast project for ConAgra Store Brands in 2004. This sanitation room entailed Arcoplast Antimicrobial wall liners, Arcoplast Antimicrobial partition walls, Arcoplast Antimicrobial doors, stainless steel trench drains, concrete curbs, sanitary coving, and resinous industrial flooring – all handled by ICS.

This is one of the many Arcoplast projects we have completed for ConAgra Store Brands in Lakeville over the past few years. ConAgra Store Brands values the long-term returns from their initial investments in top-quality Arcoplast products and ICS installations. ICS values ConAgra Store Brands as an outstanding client and we look forward to continue serving the Lakeville facility.

ConAgra has products in almost every food category and is widely recognized internationally. ConAgra Store Brands in Lakeville Minnesota is a manufacturer and distributor of private label food products such as granola bars, fruit snacks, and pie crusts for the retail grocery, club, and mass merchandise markets.
